

**ABSTRACT**

**Process and device for treating, especially for making up, for coloring or for the cosmetic care of some or all of the human or animal body**

The process for treating, especially for caring for, making up or coloring, at least a part of the human or animal body, is carried out by applying at least two treatment products simultaneously to a localized area of said part of the body as a function of characteristics of the localized area and/or of a predetermined design, in order to obtain a mixture of said treatment products directly on the localized area, at least one treatment product comprising at least one solvent in a proportion of at least 10% by weight.
